Temporary personnel integrated on-site in your teams

Expert solutions
Work packages according to your specification in-house at our premises

Experts know-how
Outsourcing, in one stop shopping from a single source

Lean Quality Management for Development and Production Planning - Guidance - Assurance - Improvement

- FMEA (Failure Mode and Effects Analysis) = early identification of problems and defining solutions
- Requirements/Training for the qualification of employees to increase competence, performance and motivation
- Product qualification to ensure maximum client satisfaction
- Optimization of logistics & supply chain to reduce costs
- Maintainability & maintenance programmes, development of reliability and safety methods, Definition of product requirements and test procedures = more reliability
- Management of product life cycle in accordance with any customer requirements and legal provisions
- Performance of process audits - continuous improvement lead to sustainability and innovation
- Support of internal and external audits (DIN/ISO 9000; AS/EN 9100 ff; DIN/ISO 14000)

Technical Expertise

Use our profound knowledge for your demanding tasks. Our know-how is based on 30 years of management experience, gained at the largest aircraft manufacturer and based on a decisive participation in determining quality standards for design and manufacturing quality, final assembly line quality and delivery quality.

The extremely high requirements within aircraft manufacturing for each part used as well as for their development, production and working processes teach precise thinking and acting – the best basis for knowledge transfer to other industries.

Many years of project experience, comprehensive industry knowledge and very high engineering and manufacturing expertise makes us the ideal partner for original equipment manufacturers (OEMs), maintenance repair and overhaul operations (MROs), or risk sharing partners (RSPs) in the aerospace environment, vehicle, wind energy and many other innovative industries.

Increase of Flexibility and Efficiency Requirements and Supply Chain Management

EXISTING OR NEW SUPPLIERS AND PRODUCTION UNITS

OFFSHORE-OUTSOURCING OR RELOCATION OF PRODUCTION ABROAD

- Quality interface between customers expectations and supplier appreciation
 - Supplier: selection - quality management - support/monitoring - qualification
 - Assessment and evaluation of delivery, quantity, quality and costs
- Process optimization: procedures, profitability, capacity (peak and off-peak times)
 - Development and production phase: product qualification, first article inspection and prototype inspection, acceptance inspections
 - Control and optimization of logistics, transport, warehousing, stock, distribution
 - Analysis of outsourcing opportunities and implementation in accordance with any customer requirements
- Preparation and accompaniment of relocation of production: strategy & feasibility studies, actual state, transfer process, preparation and planning, operative processing, resumption of production

The right partner can help you reduce costs by transnational project management and even production transfer - and still keep quality standards.

We are a part of the French Assystem Group, a leading supplier in Europe for engineering services. All national organisations use the same quality and project management standards. Our top priority is to keep the service quality required.

- > About 10,000 specialists worldwide
- > Engineering centers in 14 countries
- > Own offshore sites
- > Quality experts are on-site at customer and its suppliers
- > Cost reduction by lower overhead expenses, travel costs and standardized processes
- > IT solutions for worldwide working in the 'virtual office' in use
- > More than 40 years of experience as engineering services provider for the industry leaders of various industries
